When Friends Meet

NOW that another season for gardening is here, and we have a beautiful new Garden Book, it gives us the opportunity to again greet and meet all our old customers, and to make many new friends.

In publishing and mailing this 1932 Seed Catalog and Guide to Successful Gardening, we fully appreciate that there is, perhaps, no other kind of a book that comes so close in establishing real genuine friendships. This is due in large part to the fact that the relation between the customer and the seed grower is necessarily one of confidence.

Many of our customers are entirely dependent upon their crops. Their success—the welfare and happiness of their families for a whole year—depends upon the products of their garden or farm. Good seed means everything to these folks. That is why they continue to place their faith in Maule's Seeds year after year.

Serving Our Many Customers for 55 Years

Our progress in building up one of the largest mail order seed houses in the United States has been a steady and continuous climb up the ladder of time—now fifty-five years, to be exact.

Each season we welcome many new customers who have learned of the success of the thousands who have been buying their seeds from us for so long. That our seeds do give complete satisfaction is proved by the increasing number of orders we are receiving from every section of the country.

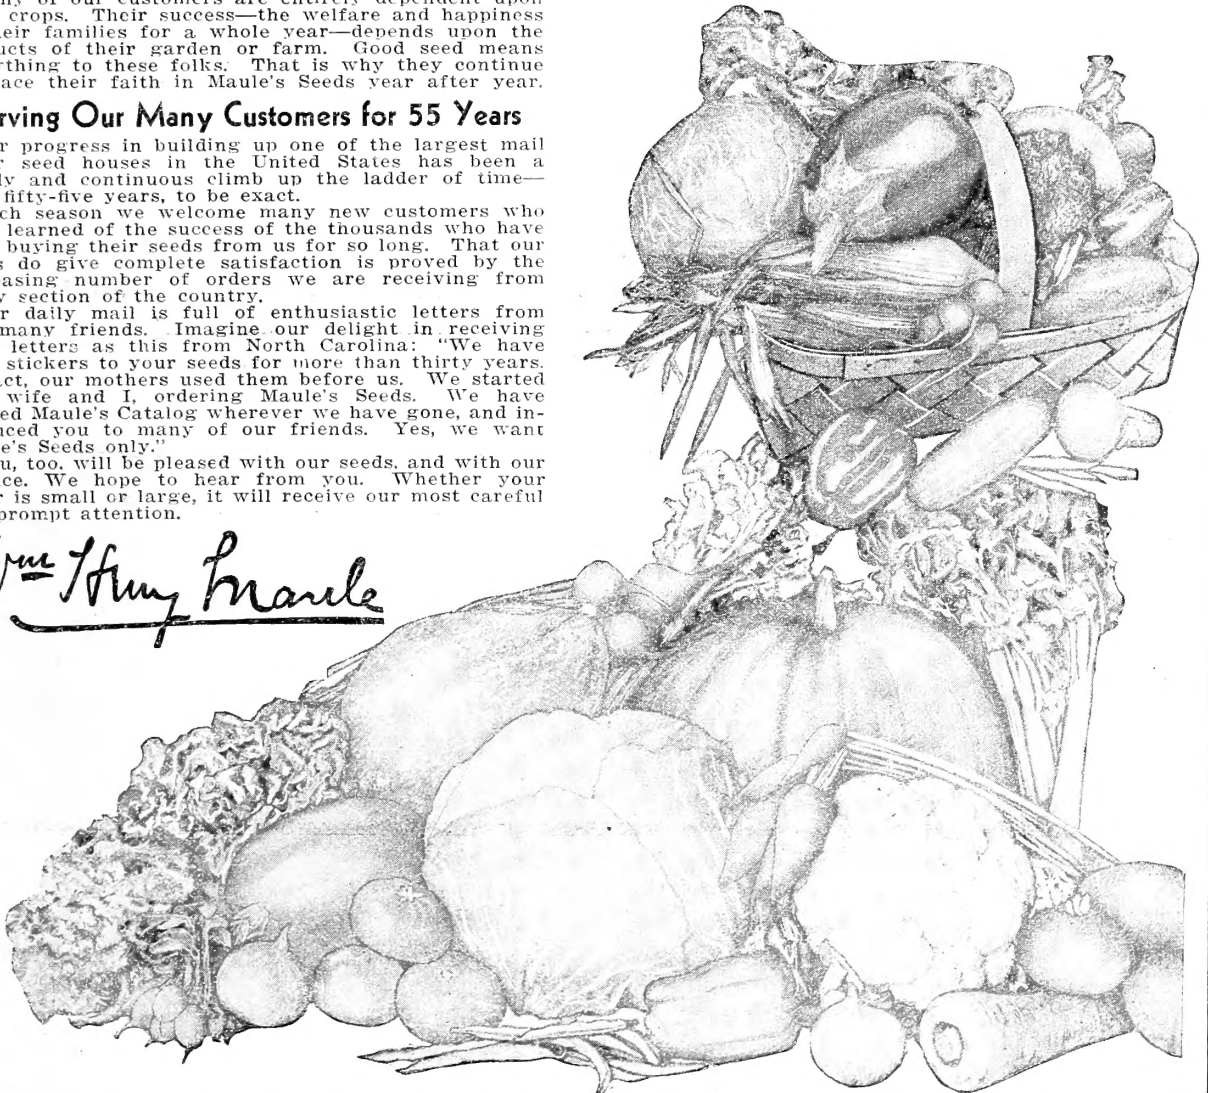

Our daily mail is full of enthusiastic letters from our many friends. Imagine our delight in receiving such letters as this from North Carolina: "We have been stickers to your seeds for more than thirty years. In fact, our mothers used them before us. We started out, wife and I, ordering Maule's Seeds. We have carried Maule's Catalog wherever we have gone, and introduced you to many of our friends. Yes, we want Maule's Seeds only."

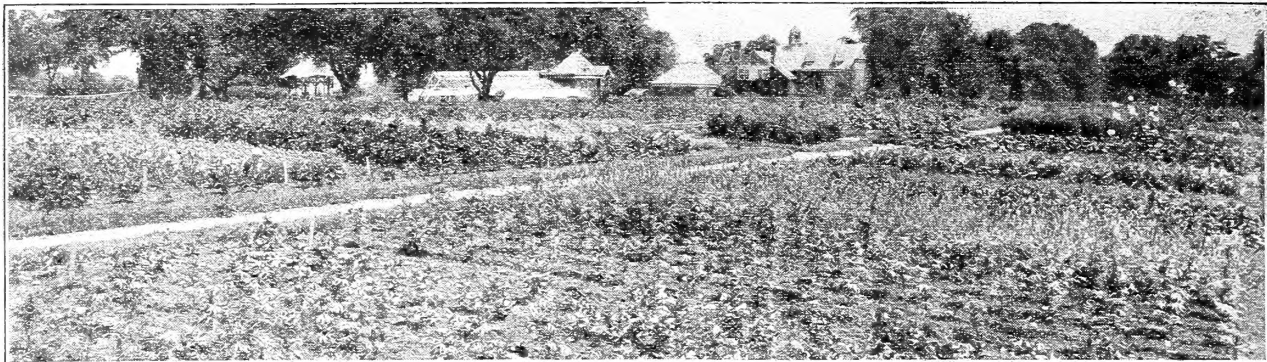

You, too, will be pleased with our seeds, and with our service. We hope to hear from you. Whether your order is small or large, it will receive our most careful and prompt attention.

Wm. Henry Maule

If you want bumper crops sow Maule's Seeds. To the customer looking forward to a large and high productive crop, much depends upon the quality of the seed. The kind of seed sown largely determines the character of the crop that may reasonably be expected. Under normal conditions good seed invariably means better and bigger crops. This becomes an important matter when it is remembered that any surplus yield over the average crop means just that much extra profit for you when marketing your products.

"The Old Reliable Seed House"

Garden of Vegetables and Flowers Produced from Maule's Seeds and Plants

Growing Seeds That Produce Big Crops

OUR selection of seeds, roots and bulbs—both Vegetables and Flowers, are the finest that can be grown. The fact that our customers continue year after year with Maule's Seeds proves their high quality. To maintain this superiority in value, the greatest of care is taken in the growing and testing of all our seeds.

Thoroughly Tested

Each lot of Maule's Seed is thoroughly tested for active, abundant, and vigorous life, so that only the most vital product is shipped. The exacting nature of these tests have won the confidence of thousands of gardeners who plant Maule's Seeds, and gladly recommend them to their neighbors and friends.

The Best Garden You Ever Had

Starting with Maule's Seeds this year you will have greater success and satisfaction with your garden than ever before. Better seeds mean a better garden. We will look for a trial order, no matter how small, from every new reader of this book. Let us prove to you

that if you want the finest garden in your neighborhood this season, you should sow Maule's Seeds.

Our Customers Win Prizes at Fairs and Shows

Every summer and fall for many years our mail has brought us letters and photographs from delighted customers who have won prizes at state, county and local fairs on their garden products raised from Maule's Seeds. We rejoice with them over their good fortune in obtaining these well merited rewards for their careful and skillful work in gardening, and it makes us glad to know that we have been of service to them in providing the kind of seed that produces prize-winners.

Representative of the increased interest that is everywhere being taken in flowers and home gardening, beautiful flower shows are now being held in many cities and towns. Exhibits are encouraged from all flower growers in the community. Here, too, Maule's Tested Seeds and Bulbs have a share in the honors, because our customers win many prizes on their flowers.

Nothing they may do in the future care and culture of the growing plants will offset the hit-and-miss policy of buying cheap and inferior seeds.

MAULE'S FOUR LEAF CLOVER MARK

In this Catalog we are using the Four Leaf Clover on all the varieties of Vegetable seed that we consider the best in their class, knowing they will grow in all sections and soils, and give the best results. If you do not know what varieties to plant, we would suggest ordering such varieties as are marked with the Four Leaf Clover.

Alphabetically Arranged

Desiring to have our Catalog just as convenient as possible for our customers when selecting the varieties they like best, we follow the plan of listing all Vegetables in alphabetical order. Thus, you will not have to consult the index so often in locating the different varieties when reading about their individual characteristics, and in making out your order.

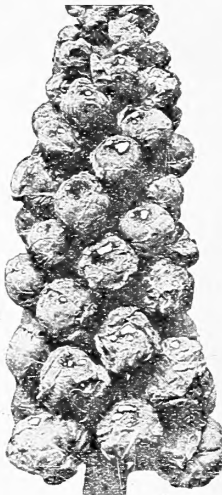

Green Globe Artichoke

2 Green Globe

2 A standard variety, grown for its buds or flower heads.
Postpaid: Packet 15c; 1/2 oz. 30c; 1 oz. 50c;
1/4 lb. \$1.50; 1/2 lb. \$2.75; 1 lb. \$5.00

CULTURE—Seed may be sown indoors, then plants set out in rows 4 ft. apart; 2 ft. apart in rows, after all danger of frost is past, which will produce heads the second spring.

108 Danish Prize

108 This large headed variety has proven to be a decided advance on anything yet offered; being of half-dwarf, sturdy growth and producing abundantly large, solid dark green sprouts of fine quality in 125 days.

Postpaid: Packet 10c; 1 oz. 30c; 1/4 lb. 85c;
1/2 lb. \$1.30; 1 lb. \$2.50; 2 lbs. \$4.55; 5 lbs. \$11.00

Danish Prize Brussels Sprouts

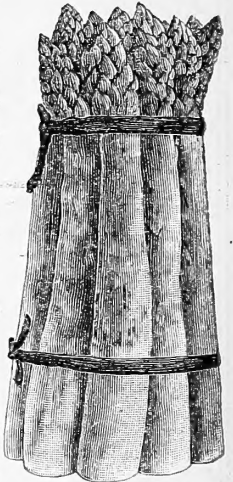

Known as Miniature Cabbage. (125 Days)

CULTURE—Excessive stem growth should be avoided by planting good but not extra rich soil. Sow seed in April or May in the open ground. Set plants in rows 3 ft. apart, 18 in. apart in row. Break leaves from stem to aid formation of heads. A packet yields about 300 plants, an ounce 3,000 plants. Ready for use in about 125 days.

Asparagus

CULTURE—Sow in the early spring in drills 2 to 3 ft. apart, scattering about 1 in. apart in drills. Cover with 1 in. of soil; cultivate freely. A packet will produce about 200 plants; an ounce about 750 plants; 4 to 5 lbs. to acre.

CULTURE—For a home garden, Asparagus Roots may be planted 18 in. apart in rows 2 1/2 ft. apart, thereby requiring about 100 roots for a patch 20 x 20 ft. 5,000 to 7,000 roots will plant an acre.

38 Golden Cluster

Bush Beans With Green Pods

CULTURE—Succeed best in warm, sandy loam, enriched with well rotted stable or poultry manure. Must not be sown until ground is warm and dry. Sow in drills 18 to 30 in. apart, 1 to 2 in. deep. Place beans 2 to 3 in. apart in drills. For a succession,

sow every two weeks until early September. A packet will sow about 25 ft. of row. Use 1 lb. to 100 ft. of drill, 60 lbs. to acre. Cultivate shallow and frequently; never when foliage is wet.

Your family will enjoy some of these beans — especially when picked fresh from the garden.

Burpee's Stringless Green Pod *

One of the Earliest. Round Podded. Always Stringless. (42 Days)

14 This is one of the most popular bush beans in America. For earliness it ranks among the first; quality is excelled by none; without a rival for bearing ability. Pods are round, fleshy and nearly straight—borne in abundance throughout a long season. Ready for table in about 42 days. Pods are 5 in. in length, rich green in color, very tender, and of highest and most delicious flavor. Remain long in edible condition. Unexcelled for home use, or for market. Seeds are of medium size; brown color. Give this Stringless Green Pod a place in your garden this season. We know you will like it.

Prolific Bush Beans—Wax Pod

CULTURE—Beans succeed best in warm, sandy loam, enriched with well rotted stable or poultry manure. They must not be sown until ground is warm and dry. Sow in drills 18 to 30 in. apart, 1 to 2 in. deep, placing beans 2 to 3 in. apart in the drills. For a succession, sow every two weeks until early

September, in this district. A packet of our seed will sow about 25 ft. of row. Use 1 lb. to 100 ft. of drill, 60 lbs. to acre. Bush beans are ready for use in 38 to 60 days. Cultivate shallow and frequently. Never pick beans or cultivate the soil when foliage is wet, as this may cause pods to spot or rust.

Never cultivate or pick beans when foliage is wet, it causes pods to spot and rust.

Unrivalled Wax *

Extremely Early with Creamy Yellow Wax Pods. (38 Days)

33 This attractive wax podded bean is the earliest maturing variety of bush bean. The plant is strong and sturdy, well branched, and produces in about 33 days an enormous crop of beautiful, semi-transparent, pale yellow pods. The almost straight, 6 in. pods remain tender for a long period. Flavor is excellent. Seeds are ochre brown color.

Maule's Blood Turnip Beets *

Many of the Leading Gardeners consider this the Best Beet on the Market. (50 Days)

See Front Cover for Colored Illustration

66 It never fails to give excellent satisfaction and continues to retain its proud position at the head of our sales list. Very early; ready for table in about 50 days. Color is a rich dark red; shape is globular. Free from side or fibrous roots; always smooth. Excellent for forcing for a main spring or summer crop. Fine for use in winter, as it is a good keeper. Always cuts and cooks a rich, dark blood red; is tender, sweet and crisp, and in every way is the standard variety for the market gardener. The dark red color of Maule's Blood Turnip Beet makes it especially desirable for canning. We strongly recommend this grand beet as the best for the home garden.

Money Making Cabbage

CULTURE—In the early Spring the seed should be sown in a frame or seed bed. When plants are sufficiently large they should be transplanted. For the main crop, the seed should be sown in a rich border in the open

air, in May or early June. Sow shallow. A packet of seed will produce about 250 plants, 1 oz. about 3,000 plants; use $\frac{1}{4}$ lb. for an acre. Set plants $1\frac{1}{2}$ x 3 ft. apart. Cabbage will be ready for use in 60 to 130 days.

Maule's First Early *

A Splendid and Profitable Extra Early Cabbage. (80 Days)

111 Maule's First Early is what is wanted for home or market. Its shape, habit of growth and general aspect are well shown in the illustration. It can safely be planted as close as Wakefield and is a sure header. It excels Wakefield and all other early cabbages in solidity of head; in fact, the head is as hard as a stone. It is a choice market sort on account of both shape and quality. It is a beautiful cabbage in appearance, being handsome in color and general uniformity. No wonder the buyers of early cabbages select these attractive heads when displayed on the market stalls. Almost anybody would pick out one of these solid flat heads.

Postpaid: Packet 15c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.75; 1 lb. \$5.00; 2 lbs. \$9.30; 5 lbs. \$22.50; 10 lbs. \$42.50

Glory of Enkhuizen

Round, Solid Heads of Superior Merit. (90 Days)

127 Medium early, maturing its heads in 90 days, with heads frequently weighing 8 to 10 lbs. each. Large sized, ball shaped heads; firm and solid. Leaves being fine ribbed and exceedingly tender. It is a dwarf and compact grower, allowing close planting.

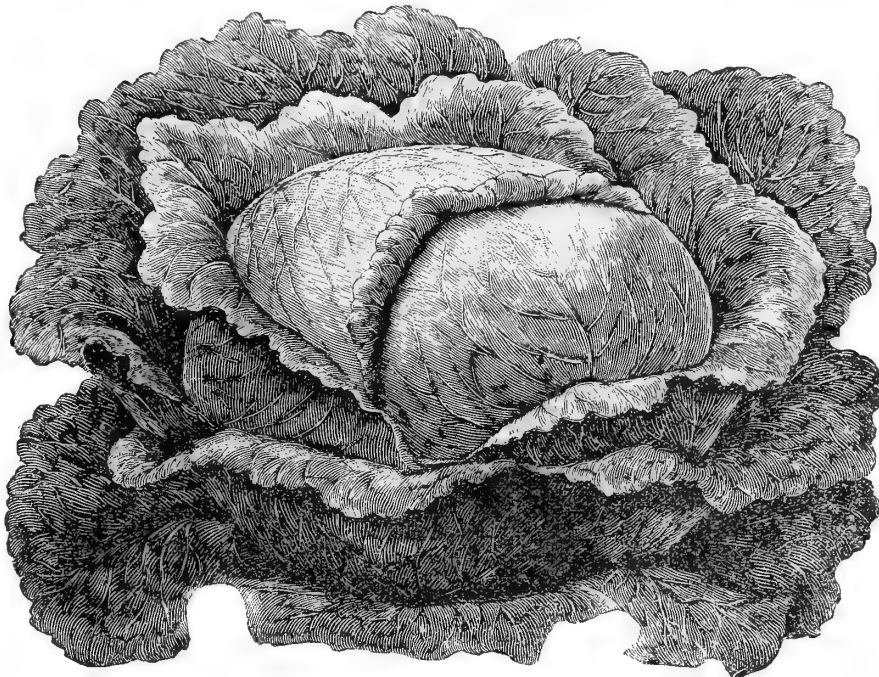

Postpaid: Packet 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.30; 1 lb. \$2.50; 2 lbs. \$4.55; 5 lbs. \$11.00; 10 lbs. \$21.00

Succession

Does Well in All Seasons. A Sure Cropper. (100 Days)

132 Heads are large, nearly round or somewhat flattened, extremely hard and solid, with finely ribbed leaves. Eating quality is not excelled by any other cabbage. Suited to all growing seasons. A sure header under most adverse conditions. Keeps well even if planted late.

Postpaid: Packet 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.25; 2 lbs. \$4.20; 5 lbs. \$10.10; 10 lbs. \$19.10

111 Maule's First Early

Maule's Winningstadt

Remarkably Hard and Solid. (100 Days)

115 Heads are slightly larger than Wakefield, and of the proper cone-shaped form. A sure header, even where other varieties fail. Seems less liable to the attack of the cabbage worm than other sorts.

Postpaid: Packet 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.25; 2 lbs. \$4.20; 5 lbs. \$10.10; 10 lbs. \$19.10

Copenhagen Market *

The Best Early Round Headed Cabbage. (75 Days)

119 Copenhagen Market

119 A valuable early maturing cabbage, producing round hard heads of the finest quality for the table or market in 75 days. Market gardeners here who tried it are strong in its praise on account of its extreme earliness and solid ten pound heads, with a small core and always of excellent quality, making it a good seller. The plants are short stemmed, producing heads almost on the ground. The light green colored leaves are medium in size, saucer shaped, and are always tightly folded; the plants may therefore be set closer than most other early varieties. It is a vigorous grower and yields.

Postpaid: Packet 10c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.10; $\frac{1}{2}$ lb. \$1.85; 1 lb. \$3.50; 2 lbs. \$6.40; 5 lbs. \$15.50; 10 lbs. \$29.50

Maule's Earliest Express

The Earliest of the Pointed Head Varieties. (70 Days)

112 Has few loose leaves, and almost every plant forms a head. Holds its place as the earliest cabbage in cultivation, as it has produced fair sized, marketable pointed heads in 70 days.

Postpaid: Packet 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 70c; $\frac{1}{2}$ lb. \$1.10; 1 lb. \$2.00; 2 lbs. \$3.60; 5 lbs. \$8.75; 10 lbs. \$16.75

Maule's Midsummer *

Controls the Garden or Market from Spring to Fall. (95 Days)

126 This intermediate variety matures soon after All Head Early, producing much larger heads, of unsurpassed beauty and solidity. It has noteworthy compactness of growth, which permits close planting. A truly fine summer cabbage in all respects, producing from June until October. Ready for table in 95 days.

Maule's Midsummer Cabbage has met with wide appreciation and hearty endorsement. We do not know of a sort more important to gardeners.

Postpaid: Packet 10c; 1 oz. 30c; $\frac{1}{4}$ lb. 90c; $\frac{1}{2}$ lb. \$1.40; 1 lb. \$2.50; 2 lbs. \$4.65; 5 lbs. \$11.25; 10 lbs. \$21.25

110 One of the most profitable home garden or market varieties for the early crop. Plants are dwarf, allowing close planting; solid heads, round as a ball, measuring, when fully matured, about 9 in. in diameter, averaging 5 lbs. each. Hard as a cannon ball, solid, and very uniform. Heads mature in about 70 days and practically all at one time. They are exactly like one another in size and form.

Postpaid: Packet 15c; 1 oz. 50c; ¼ lb. \$1.40; ½ lb. \$2.60; 1 lb. \$4.75; 2 lbs. \$8.85; 5 lbs. \$21.35; 10 lbs. \$40.35

* Maule's Four Leaf Clover Mark *

We are using the Four Leaf Clover on all such varieties of vegetable seeds that we consider the best in their class, knowing they will grow in all sections and soils, giving the best results. If you do not know what varieties to plant, we would suggest ordering such varieties as are marked with the Four Leaf Clover.

All Head Early*

The All Year Round Cabbage. (90 Days)

116 It has proven itself to be adaptable to a wide range of both soil and climate, and is well worthy of recognition as a standard American sort. It is a money maker for gardeners and a very desirable sort in every garden. It is the earliest of large cabbages, being ready for the table or market in about 90 days. The deep flat heads are remarkably uniform in shape, size and color. Good quality and tenderness are its marked features.

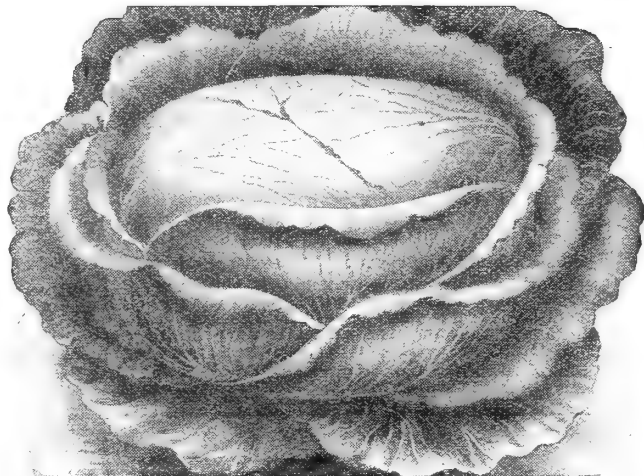

Postpaid: Packet 10c; 1 oz. 25c; ¼ lb. 85c; ½ lb. \$1.30; 1 lb. \$2.50; 2 lbs. \$4.55; 5 lbs. \$11.00; 10 lbs. \$21.00

Charleston Wakefield

An Improved and Larger Form of Prize Jersey Wakefield. (90 Days)

118 The Charleston Wakefield is an improved and larger form of Maule's Prize Wakefield. It requires rather more time to reach maturity, but it yields fully twice the crop of the original Wakefield cabbage. It comes along in a close succession to the earliest cabbage crop producing its pointed heads in about 90 days. It is a strain which cannot be profitably overlooked by any gardener, whether it is intended for a private garden or to be sent to market.

Chinese Cabbage

125 Danish Ball Head Cabbage

Danish Ball Head Cabbage Middle Stem *

Our Strain of this Wonderful Variety is Unsurpassed. A Big Money Maker. (120 Days)

125 Produces round, solid, hard heads which are extremely heavy, though not extra large. Can be grown in close quarters, on account of its compact habit. As to its keeping qualities, it comes out of the pit in March or

April as fresh as when put in, and with no waste. Popular in the markets of large cities.

Postpaid: Packet 10c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.10; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$3.25; 2 lbs. \$6.00; 5 lbs. \$14.50; 10 lbs. \$27.50

Penn State Ball Head

A New Development of this Famous Shipping Cabbage. (120 Days)

122 Penn State Ball Head was developed by Prof. C. E. Myers of Pennsylvania State College. Its unusual tonnage record is due to painstaking selection for hard, tight heads weighing at least one-third more than Danish Ball Heads of equal size. The production yields in New York State average about 12 tons per acre. Penn State

Ball Head shows records of over 20 tons per acre. This extra tonnage, combined with fewer cracked heads and better storage quality, placed Penn State Ball Head in a class of its own.

Postpaid: Packet 15c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.75; 1 lb. \$5.00; 2 lbs. \$9.30; 5 lbs. \$22.50; 10 lbs. \$42.50

Danish Round Head Cabbage Short Stem *

Heaviest Yields, Often Producing 12 to 15 Tons Per Acre. (110 Days)

124 In this strain we have very large, solid heads on short stems, produced in about 110 days. Has same keeping quality as original strain of Danish Ball Head, so widely known. It is 10 days to 2 weeks earlier, and produces a larger yield than any of the so-called Danish cabbages. Especially valuable for high, dry land, producing good sized heads where other strains would be too small. For shipping in the late fall or winter there is no finer cabbage than this strain. Also an excellent home or market sort. Our stock comes direct from the originator in Denmark.

Postpaid: Packet 10c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.10; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$3.25; 2 lbs. \$6.00; 5 lbs. \$14.50; 10 lbs. \$27.50

124 Danish Round Head

Wisconsin All Seasons

The Yellow Disease-Resistant Cabbage. (105 Days)

128 This new strain developed at Wisconsin Experiment Station has proved very successful as a yellow disease-resistant cabbage, in districts where large plantings are made for kraut. Large size heads. Matures in about 105 days.

Postpaid: Packet 15c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.40; $\frac{1}{2}$ lb. \$2.65; 1 lb. \$5.00; 2 lbs. \$9.20; 5 lbs. \$22.25; 10 lbs. \$42.25

Improved Drumhead Savoy *

The Best Crumpled Leaf Cabbage. (110 Days)

141 Noted for its fine and delicate flavor. Leaves are wrinkled or densely crumpled. Plants are vigorous, of medium size, with rather short stem, and are very sure heading. Matures fine large heads in 110 days. A good winter keeper.

Postpaid: Packet 10c; 1 oz. 30c; $\frac{1}{4}$ lb. 90c; $\frac{1}{2}$ lb. \$1.40; 1 lb. \$2.50; 2 lbs. \$4.65; 5 lbs. \$11.25; 10 lbs. \$21.25

Choice Cauliflower

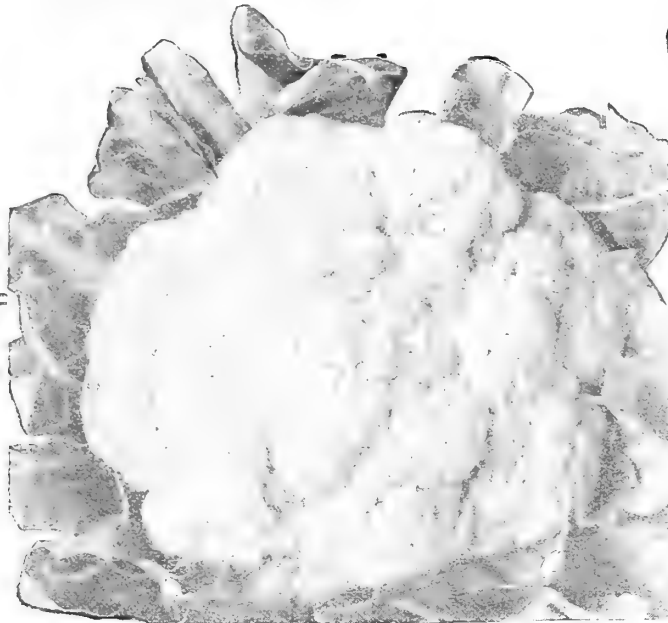

CULTURE—Seed for extra early cauliflower may be started in Autumn in a cold frame, or in early Spring in a hot bed. When large enough, the plants should be transplanted to garden or field. For main crop, Summer and Autumn, the seed should be sown in May or early June. A packet will produce about 150 plants, 1 oz. about 3000 plants; $\frac{1}{4}$ lb. for an acre. When transplanting, set the plants 2 to 3 ft. apart each way. Ready for use in 90 to 130 days.

Maule's Prize Earliest *

The Earliest, Largest and Surest Header of Any Cauliflower. (90 Days)

164 We consider this at the top of the list as the earliest, finest, and most handsome cauliflower. Every plant produces a head. Whether for forcing under glass or growing in the open ground, and whether planted early or late, it is the surest header of all, maturing its heads in about 90 days. It is very dwarf and compact in habit of growth, and can be planted as close as 18 in. each way for forcing or where space is limited. Particularly desirable for forcing under glass, while in the garden every plant produces a head.

Postpaid: Packet 25c; $\frac{1}{4}$ oz. \$1.00; $\frac{1}{2}$ oz. \$1.65; 1 oz. \$2.80; $\frac{1}{4}$ lb. \$8.25; $\frac{1}{2}$ lb. \$15.25; 1 lb. \$28.00

164 Maule's Prize Earliest

Autumn Giant

A Very Large, Late Variety. (130 Days)

173 The heads are large, very white, and of the best quality. Matures in about 130 days. As the heads are protected by the foliage they remain usable a long time.

Postpaid: Packet 10c; $\frac{1}{4}$ oz. 20c; $\frac{1}{2}$ oz. 30c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.40; $\frac{1}{2}$ lb. \$2.65; 1 lb. \$5.00

Early Favorite

Moderate Early. (115 Days)

172 Will stand heat and drought well. Desirable in regions where other varieties have failed. Produces large, white heads in about 115 days.

Postpaid: Packet 10c; $\frac{1}{4}$ oz. 40c; $\frac{1}{2}$ oz. 65c; 1 oz. \$1.00; $\frac{1}{4}$ lb. \$3.00; $\frac{1}{2}$ lb. \$5.50; 1 lb. \$10.00

CARROTS—For Stock Feeding

CULTURE—Sow the seed any time before July 1st. It is best to sow seed $\frac{1}{2}$ in. below the surface, in rows 24 to 30 in. apart. Thin to 6 in. in the row. Sow a packet to 60 ft. of drill, 1 oz. to 400 ft., 2 lbs. to the acre. Ready to use in 80 to 90 days.

Long Lemon Stump Rooted *

156 Considered the best yellow carrot ever offered to American farmers. Also known as Lobberichs Agricultural. It is of a rich yellow color, stump-rooted, and grows to a large size. Matures in 80 days.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 60c; 1 lb. 95c; 2 lbs. \$1.70; 5 lbs. \$4.05; 10 lbs. \$7.10

Improved Short White

158 This is one of the very best. Carrots are half long, 7 to 9 in. in length. Smooth, very heavy at shoulder, tapering regularly to point. Matures in about 85 days. Also known as Mastodon carrot. Color is creamy white with light green crown. Flesh is white, solid, crisp, and of excellent quality for stock feeding.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 45c; 1 lb. 85c; 2 lbs. \$1.50; 5 lbs. \$3.50; 10 lbs. \$6.25

Large Yellow Belgian *

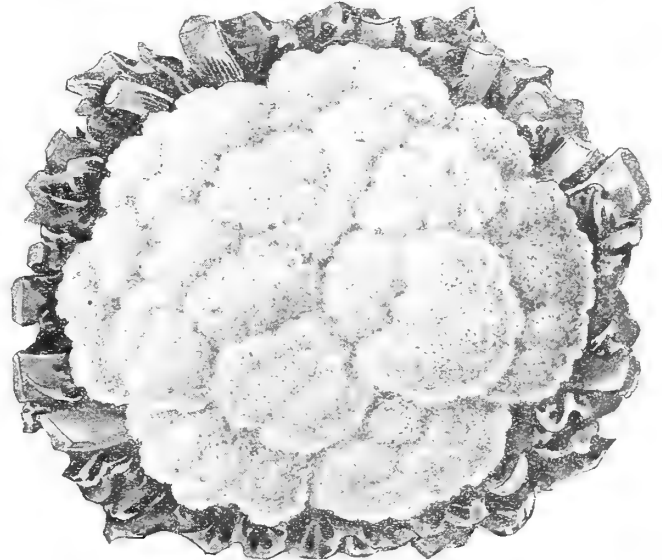

162 An enormous yielder. This is the giant among carrots. Produces an immense crop in about 90 days. Skin is of a pale orange color. Flesh is light orange, which is preferred by many farmers.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 45c; 1 lb. 85c; 2 lbs. \$1.50; 5 lbs. \$3.50; 10 lbs. \$6.25

Large White Belgian

161 A great producer. Our strain of this variety forms its roots entirely under ground. Roots average 2 in. in diameter at shoulder, and 1 ft. or more in length. Tapers gradually toward base. Flesh and skin are pure white, tinged with green on top.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 45c; 1 lb. 85c; 2 lbs. \$1.50; 5 lbs. \$3.50; 10 lbs. \$6.25

168 Early Snowball

Early Snowball *

Large, Solid White Heads. A Sure Cropper. (95 Days)

168 This standard variety is known everywhere. It is a favorite both in the home garden and with market gardeners. Produces large, solid, white heads when conditions are ordinarily favorable in about 95 days. Averages about 9 in. in diameter, and often attains a size of 12 in.

As it is one of the earliest strains of cauliflower it has become one of the most popular varieties for forcing under glass during winter and spring, as well as for planting in the open ground. The plants are compact which enables close planting.

Postpaid: Packet 15c; $\frac{1}{4}$ oz. 80c; $\frac{1}{2}$ oz. \$1.40; 1 oz. \$2.50; $\frac{1}{4}$ lb. \$7.50; $\frac{1}{2}$ lb. \$13.75; 1 lb. \$25.00

Dry Weather *

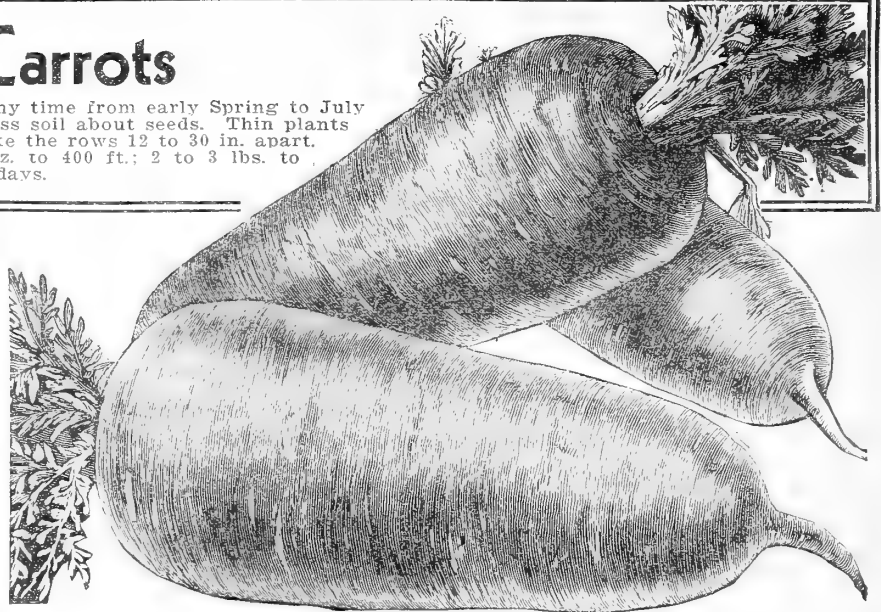

Reaches Perfection When Ordinary Varieties Fail. (105 Days)

165 Originating in Denmark, this desirable strain is now being grown in America with the most favorable results. Produces a large, solid, pure white head, maturing in about 105 days. In all respects a first-class Cauliflower. Well adapted to dry situations for resisting the effects of drought, although it also does well in moist or wet seasons, making heads equal to any. An excellent home or market variety.

Postpaid: Packet 15c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.30; 1 oz. \$2.40; $\frac{1}{4}$ lb. \$7.20; $\frac{1}{2}$ lb. \$13.20; 1 lb. \$24.00

Garden Carrots

CULTURE—Sow the seed in drills any time from early Spring to July. Cover seeds $\frac{1}{2}$ to 1 in. deep, and press soil about seeds. Thin plants so they will be 2 to 6 in. apart. Make the rows 12 to 30 in. apart. Use a packet to 60 ft. of drill; 1 oz. to 400 ft.; 2 to 3 lbs. to the acre. Ready for use in 45 to 75 days.

152 Maule's Danvers Half Long

Maule's Danvers Half Long *

The Most Popular Carrot for the Home Garden or Market. (70 Days)

152 Well adapted to all soils and sections. Is half-long in shape; almost cylindrical; somewhat stump rooted. Color is a rich, dark orange. Over 40 tons per acre of Maule's Danvers have been grown, and a yield of 25 to 30 tons per acre is not uncommon. Matures in about 70 days. Grown extensively by market gardeners.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 55c; 1 lb. 95c; 2 lbs. \$1.65; 5 lbs. \$3.90; 10 lbs. \$7.00

Mixed Table Carrots

One Sowing Produces Carrots All Season. (45 to 75 Days)

163 A most desirable mixture for planting in the home-garden where a few carrots are wanted for the table. One planting is all that is necessary for the season.

Postpaid: Packet 10c; 1 oz. 15c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 60c; 1 lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00

Oxheart or Guerande

A Great Producer. A Good Keeper. (65 Days)

155 Touchon

151 Chantenay or Model

Highly esteemed as a table delicacy, and for its special value as a nerve tonic.

Blue Ribbon Celery

CULTURE—Sow thinly in early spring, cover lightly. Keep constantly moist. Count on about 400 plants to a packet of seed; about 7,500 plants per ounce; or a quarter pound per acre. Celery is mostly grown under flat

culture, without trenches, in rows 4 ft. apart, plants 6 in. apart in row. Where winter storage is contemplated, this plan is excellent, as it allows space for soil in banking, without lifting plants.

Emperor

Largest Hearted and Best Nut Flavored Celery. (135 Days)

177 A well known, true dwarf variety. Much easier to blanch than the taller growing varieties. Ready for market or table in about 135 days. Plants grow 15 to 18 in. high. Stalks are smooth and very thick. Heart is tinged with yellow. Crisp, and of a decidedly nutty flavor. An excellent keeper.

Postpaid: Packet 10c; ½ oz. 35c; 1 oz. 60c; ¼ lb. \$1.80; ½ lb. \$3.30; 1 lb. \$6.00; 2 lbs. \$11.15; 5 lbs. \$27.00; 10 lbs. \$51.00

Columbia

For Fall or Early Winter Use. (115 Days)

180 Stalks are broad and thick, solid, almost round, and of the highest quality. Very attractive in appearance. Foliage is of a distinct light shade of green, with a tinge of yellow. The plant is of medium height. Matures in 115 days.

Postpaid: Packet 10c; ½ oz. 25c; 1 oz. 40c; ¼ lb. \$1.20; ½ lb. \$2.29; 1 lb. \$4.00; 2 lbs. \$7.45; 5 lbs. \$18.00; 10 lbs. \$34.00

Maule's American Yellow *

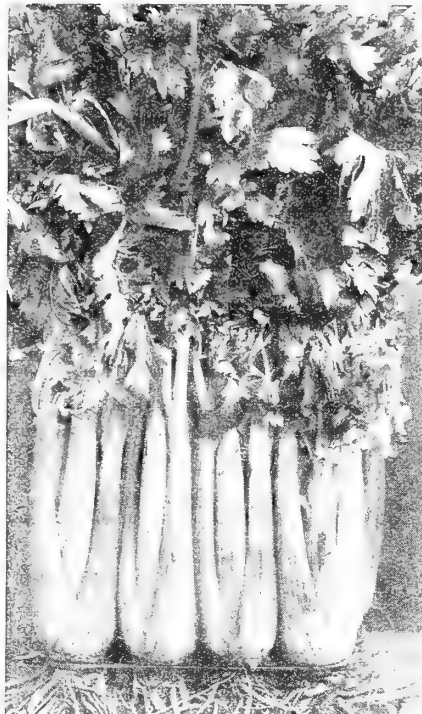

Favorite Self-Blanching Variety for Both Home and Market. (110 Days)

189 An early, self-blanching variety similar in many ways to XX French grown Golden Self-Blanching, except that it has a larger stalk, and with the additional advantage that it fills a standard celery crate more evenly. Matures its beautiful golden yellow stalk in about 110 days.

Postpaid: Packet 10c; ½ oz. 35c; 1 oz. 60c; ¼ lb. \$1.75; ½ lb. \$3.25; 1 lb. \$6.00; 2 lbs. \$11.00; 5 lbs. \$26.75; 10 lbs. \$50.50

181 White Plume Celery

176 Golden Plume or Wonderful

Golden Plume or Wonderful *

Blight Resistant, Free from Strings. (110 Days)

176 A new type of the famous Golden Self-Blanching Celery. Plants are semi-dwarf, with thicker stalks, very full heart, and wider leaves. Bleaches to a beautiful golden yellow color. Ready for table or market in about 110 days. Its attractive appearance, superior quality, fine nutty flavor and resistance to attacks of blight and rust make it an unusually profitable variety for the market.

Postpaid: Packet 15c; ½ oz. 40c; 1 oz. 75c; ¼ lb. \$2.25; ½ lb. \$4.10; 1 lb. \$7.50; 2 lbs. \$13.95; 5 lbs. \$33.75; 10 lbs. \$63.75

Perfected White Plume *

The Most Delicious Celery in Cultivation. (120 Days)

181 Easily and quickly blanched. A truly beautiful type of celery. Not only does the stem whiten, but the leaf itself—especially every inner leaf—assumes the attractive white color. White Plume is noted for its succulence, crispness and high quality.

Postpaid: Packet 10c; ½ oz. 20c; 1 oz. 30c; ¼ lb. 95c; ½ lb. \$1.60; 1 lb. \$3.00; 2 lbs. \$5.50; 5 lbs. \$13.25; 10 lbs. \$25.25

Winter Queen

Best Winter Variety. A Money Maker. (140 Days)

185 Probably the most desirable winter keeping celery. Short, stout, thick and heavy, with double the amount of heart of any other celery—a habit of growth which gives it truly remarkable value. Flavor is sweet and nutty. Matures in 140 days.

Postpaid: Packet 10c; ½ oz. 20c; 1 oz. 30c; ¼ lb. 95c; ½ lb. \$1.60; 1 lb. \$3.00; 2 lbs. \$5.50; 5 lbs. \$13.25; 10 lbs. \$25.25

Every garden can find space for at least a few rows of luscious sweet corn.

Sweet or Sugar Corn

CULTURE—Plant the seed when danger of frost is over. Sow in drills, 2 x 3 ft. or 3 x 4 ft. apart, about 1 in. deep, and the seed 8 in. apart in the rows, or 4 seeds may be dropped in hills 3 to 4 ft. each way. Allow 2 or 3 plants to remain in a hill.

Make successional plantings until about July 10th (depending upon your climate) to insure plenty of corn during the summer, and to have enough to dry or can for winter use. A packet will plant about 100 ft. of drill, ½ lb. for 200 hills; 12½ lbs. per acre.

The Finest Large Eared Sugar Corn in Existence

Maule's Colossal Early *

A Variety that is Sure to Prove Successful for

205 Maule's Colossal has four principal points that have made it so deservedly popular.

First—Earliness. Can be depended upon to generally produce ears of large marketable size in 65 to 70 days.

Second—Flavor. The most delicious sugary corn you have ever eaten.

Third—Size. Undoubtedly, the largest eared early sugar corn in existence, as the ears average from 7 to 9 in. in length, and frequently are 2½ to 3 in. in diameter, with 12 to 14 rows of large sweet kernels.

Two good size ears are generally found on every stalk. Grows from 6 to 7 ft. tall, which furnishes a most desirable fodder. **Fourth**—A Money Maker. Every market gardener should grow Maule's Colossal Early Sugar Corn. It will prove profitable.

205 Maule's Colossal Sugar Corn

MAULE'S TESTED SEEDS

The Best Way to Get Good, Sweet Sugar Corn is to Grow it Yourself

Always Fresh and Genuine 23

Do you want delicious corn on your table the 4th of July? Then plant this extremely hardy early maturing, large eared variety.

Maule's Ideal Early*

In a Class by Itself. (55 Days)

206 In this early corn, we have produced a variety which contains a sweetness equal to most true sugar varieties.

It has the power of germination under conditions where all others have failed, and can safely be planted much earlier than any true sugar corn on account of its extreme hardness. It adapts itself to any kind of soil, either sand or heavy clay.

The stalks grow 6 ft. high; no small item to a gardener who wishes to use them as fodder. As a proof of its quality and sweetness, we have a continuous and increasing call for "Ideal" from our customers year after year. Extremely early. Anyone growing this pearly white grain corn will have the crop marketed and the money in his pocket before any of the early sugar corns are ready. Matures in about 55 days. For his own profit, every gardener should plant Maule's Ideal Early.

Postpaid: Packet 10c; ½ lb. 25c; 1 lb. 40c; 2 lbs. 70c; 5 lbs. \$1.60; 10 lbs. \$3.00

Maule's "Lead All" Evergreen Sugar Corn*

Sweetest and Most Delicious Sugar Corn for a Main Crop. (85 Days)

222 A distinct new sugar corn of the evergreen type. Produces the most handsome ears imaginable, which are sweeter and larger than either Country Gentleman or Stowell's Evergreen. Stalks grow 8 to 9 ft. high, usually producing 2 large, well developed ears 8 to 10 in. long to each stalk. The large, white grains, of great tenderness and sweetness, are deep set, with 14 to 18 rows on the cob. Usually ready for the table or market in about 85 days. Withstands drought unusually well. Holds its edible qualities better than most other varieties. This variety will prolong the Corn season, whereby anyone can have Sweet Corn very late in the season. It was first

offered by us in 1918 and is now one of our leading specialties. The seed we offer is of a very fine pedigree strain of our own growing and breeding and is sure to satisfy the most critical gardener. Both home or market.

221 Stowell's Evergreen

POP CORN

CULTURE—Plant in hills when danger of frost is over. 3 to 4 ft. apart each way, leaving 3 to 4 stalks to the hill. Or in drills 3 to 4 ft. apart, dropping the seed a foot apart in the drills. A packet will sow 150 ft.; 4 lbs. to an acre.

Queen's Golden

(130 Days)

234 This is perhaps the handsomest of all the pop corns when on the ear, surpassing all others in size and color. It pops perfectly white, and a single kernel will expand to nearly an inch. Produces 3 to 4 ears on a stalk. Matures in about 130 days.

Tom Thumb *

(130 Days)

235 Also known as Japanese Hulloless and Dwarf Baby Rice. A heavy yielder of attractive ears that are peculiar in form, being nearly as thick as they are long. Kernels are similar to Monarch White Rice, only being longer, slimmer, and pearly white. Its crowning merit lies in its popping quality, fine flavor, and absence of hull or shell. Has most tender and delicious flavor, no hard particles in kernels. Stalks grow about 5 ft. high. Bears 2 or 3 perfect ears.

Monarch White Rice

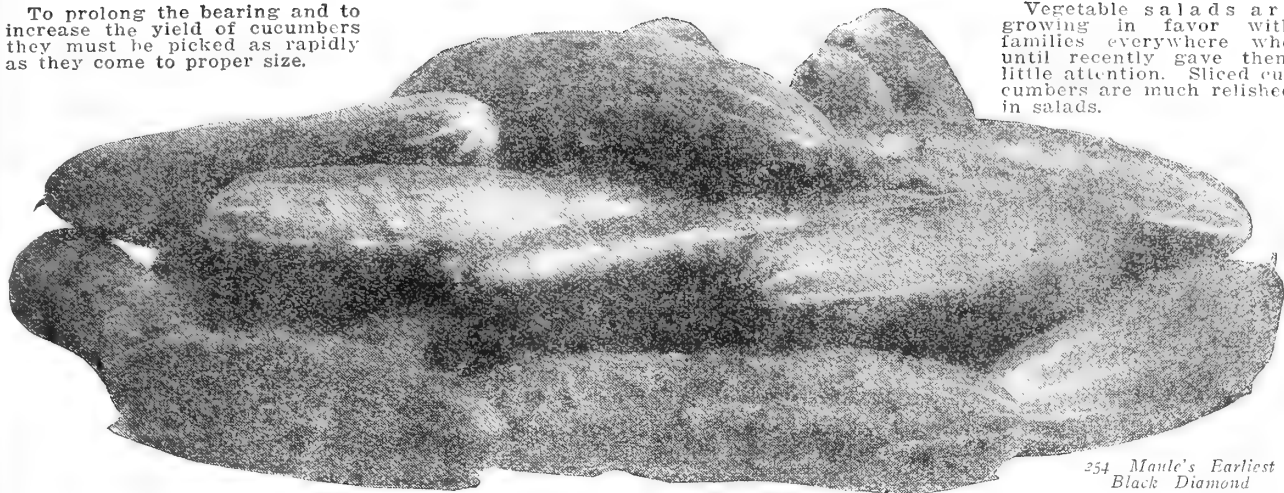

(140 Days)

237 The most popular variety for popping. Everybody knows this old favorite. Our strain is an improvement with larger ears, and ears are more abundantly produced. Three ears on a stalk is not a rare occurrence, maturing its long, slender ears in about 140 days. The white grains are sharply pointed, but when popped are very full. Honey coated pop corn crisps are made from this variety.

To prolong the bearing and to increase the yield of cucumbers they must be picked as rapidly as they come to proper size.

Vegetable salads are growing in favor with families everywhere who until recently gave them little attention. Sliced cucumbers are much relished in salads.

254 Maule's Earliest Black Diamond

Just what you will want for pickling purposes, for slicing, and for making delicious salads.

Big Crop Cucumbers

CULTURE—Sow seed when danger of frost is over, in hills 4 to 5 ft. each way. Sow 8 to 10 seeds half an inch deep, and thin out finally to 3 or 4 plants to the hill. For

pickles, plant during June and July. Use a packet of seed to 15 hills; 1 oz. to 75 hills; 2 to 3 lbs. to acre. Ready to use in 50 to 80 days. Leave none to ripen on vines.

Tomatoes That Are Most In Demand Today

CULTURE—Sow the seed in February or March, in a hotbed, greenhouse, or in shallow boxes in the house. Sow $\frac{1}{2}$ in. deep in rows that are 4 to 6 in. apart. When plants are about 2 in. high, transplant to 3 in. pots, or into shallow boxes placed 4 in. apart

each way. Transplant in the open ground after all danger of frost is past, 3 to 4 ft. apart each way. Cultivate frequently. A packet will produce about 100 plants, 1 oz. about 3,500 plants—enough for an acre. Ready to pick in 85 to 120 days.

All the various good qualities you want in Tomatoes will be found in these varieties.

Maule's Success Tomato *

(The Best All-Around Red Sort. 110 Days)

652 (Bright Red.) Maule's Success is smooth, well formed and extremely deep from stem to blossom, making it unusually heavy. It ripens evenly to the stem, and is without ridges or cracks; has great meatiness and few seeds. It is firm, without being hard. The vines are vigorous but compact. Maule's Success is the heaviest for its size of any variety; on account of its brilliant red color, depth and solidity, it is the handsomest main crop tomato we have ever seen. Ready to pick in about 110 days.

Field Corn That Yields Big Crops

CULTURE—Plant when weather has settled, and ground has become warm. Plant in hills, 4 ft. apart each way, allowing 2 or 3 plants to remain in a hill; or sow in drills, 4 ft. apart, dropping one seed each foot in the drill. Use 14 lbs. of seed to the acre.

For fodder or ensilage, sow thickly in drills 3 to 4 ft. apart. Use 56 or 84 lbs. per acre. With each variety, we indicate the time usually required to mature under favorable weather conditions. All prices of corn seed are subject to change without notice.

There's no guessing about the high quality of your seed when you get Maule's Corn.

Maule's Droughtproof Yellow Dent

Resists Drought and Scorching Heat Better Than Any Other Variety. (90 Days)

802 Produces handsome ears of good size. Symmetrical shape. Has largest grains and smallest cob of any Yellow Dent corn. In fact, from 70 lbs. of corn on the ear, it is not unusual to obtain 64 lbs. of shelled corn with only 6 lbs. of cobs which cannot be equalled by any other corn in existence. Grains are of a deep wedge shape, and of the brightest yellow color.

Maule's Famous Lawn Grass Mixtures

Maule's "Extra Quality" Lawn Grass Mixture

A Beautiful, Smooth, Low Growing, Evergreen Grass for Your Yard or Lawn

891 Will insure a beautiful, compact, evergreen sod, guaranteed to grow on any lawn where the essential requirements of grass culture have been complied with. Mixture includes those grasses peculiarly adapted to lawns and yards, including choice selected strains of Kentucky Blue, etc. Contains also the best known creeping or sod forming varieties of grass. We have included a small amount of choice white clover, as we regard a good clover as an essential in any lawn grass mixture. The different varieties provide for a succession of growth, so that there will not be any break in the richness of the verdure, from early spring until autumn. The experience of thousands of home lovers proves that Maule's "Extra Quality" Lawn Grass Mixture is just about perfect. Nothing better can be purchased anywhere at any price. We will stand on this statement. If you wish this Mixture without white clover, we can supply it (at same prices), but in ordering please be sure to mention that you want it without clover.

Grass seed can be sown successfully any time between April and September.

Maule's 3 Permanent Grass Pasture Mixtures

The World's Best Varieties for Producing an Abundant Hay Crop, and for Pasturage

It can be truly said, beyond all question, that a proper mixture of grasses will produce a better mowing field, and permanent pasture, than a simple combination of timothy and clover. Experience has proved that a proper mixture of grasses will last five times as long as the combination of timothy and clover. Timothy "runs out" in a couple of years or so, while a good permanent pasture should last ten or even twenty years.

In preparing Maule's Permanent Pasture Grass Mixtures we use mainly such time tried and successful grasses as Kentucky Blue, Timothy, English Rye, Italian Rye, Fancy Red Top, Orchard, Meadow Fescue, Canadian Blue, and Crested Dogstail.

The clovers we use are likewise old-time favorites, including Red, Alsike and White. We vary the proportions to suit different soils.

For many years Maule's Flower Seeds have been the favorite of thousands of flower lovers, but never before were we so fortunate in being able to offer so many marvelous varieties and strains of all kinds of pretty flowers.

All our old customers, we are sure, will want to increase their orders this year. To those who may not have ordered from us previously, may we say that you will be most pleasantly surprised with the personal interest taken in your order, the promptness with which all our shipments are made—and most important of all, with the beauty of the flowers as they bloom in your garden and home.

More Flowers Are Being Grown Everywhere

This is a time of change and improvement in everything that affects the home. In a few short years we have seen our homes transformed by the aid of electric labor-saving devices and other modern conveniences. There is more leisure

time in the home, and an increased desire for those things that bring joy and happiness to all. Nothing will so quickly brighten a home as some lovely flowers.

Surely, when so much beauty and joy can easily be brought into the lives of those around us, we should not fail to accept the opportunity to make our home more attractive to family and friends.

In this book it has been our desire to make it easy for everyone to be able to select the flowers they most admire, and which are best adapted to various purposes. On page 85 will be found a list of the most popular flowers, and the purpose for which they are particularly suitable.

We Pay the Postage on All Flower Seeds

All of our flower seeds, in any quantity, are sent to you postpaid.

All bulbs and roots, in any quantity, are sent postpaid—except where noted. Rose bushes, flowering shrubs, and hedge plants are delivered prepaid by parcel post or express, except where noted.

Classification of Flowers

Flowers are divided into three classes—Annuals, Biennials, and Perennials.

Hardy Annuals

Plants Bloom Only the One Season

Popular where quick results are desired with the least expenditure of time and money. Some Annuals are raised for foliage effect, but the main desire is for beautiful, colorful flowers to brighten the home. Excellent for cut-flower purposes. Seed may be started in the open ground in early spring, or sown indoors for earlier effect.

Half Hardy Annuals

Will Bloom Only the One Season

Seed should be sown in boxes in the house or in hot-beds during March and April, then about the time trees come into leaf set the plants out in the open ground.

Hardy Biennials

Bloom the Following Season After Sowing Seed.

Bloom One Season Only

Seed may be started in the open ground in early spring, or sown indoors for earlier effect.

Half Hardy Biennials

Bloom the Following Season After Sowing Seed.

Bloom One Season Only

Seed may be started in boxes in the house or in hot-beds during March and April, then about the time trees come into leaf, set the plants out in the open ground. Plants require protection during the winter.

Hardy Perennials

Bloom the Following Season After Sowing Seed. Then Continue Blooming Each Succeeding Year

Seed may be sown in early spring, or during July and August, to produce plants that will bloom the following season. The seed of some Hardy Perennials, if sown very early, will produce plants that will bloom the same season. It is not necessary to give these plants protection during winter, although a covering of leaves, litter, or straw manure will prove beneficial. After being once established a hardy bed or border requires practically no attention. If the varieties have been properly selected, a bed of Hardy Perennials should provide an abundance of flowers from early spring until frost.

Half Hardy Perennials

Bloom the First Season After Sowing Seed. Winter Blooming Indoor

Seed should be sown in boxes in the house or in hot-beds during March and April, then about the time trees come into leaf, set the plants out in the open ground. Before frost, plants set out in the open ground should be lifted and placed in pots so they can be cared for in the house during winter.

In recent years, Antirrhinums or Snapdragons have become very popular. Few flowers have such a range of gorgeous colorings. The long, fragrant spikes are well adapted for cut-flowers. They are very satisfactory for borders, bedding, and pot culture for house decoration.

Maximum, New Giant

Surpasses any other strain ever grown. Slightly taller than the Tall Giant Flowering varieties. Flowers are the largest of all, and closely placed on spike. Immensely popular for cutting; attractive in beds or borders.

927 APPLE BLOSSOM. Long sturdy spikes; well-shaped flowers of a delicate apple-blossom pink with a yellow lip.

931 FIRE FLAME. Bright fiery red with a suffusion of deep orange and a rich scarlet glow. Large blooms, long spikes.

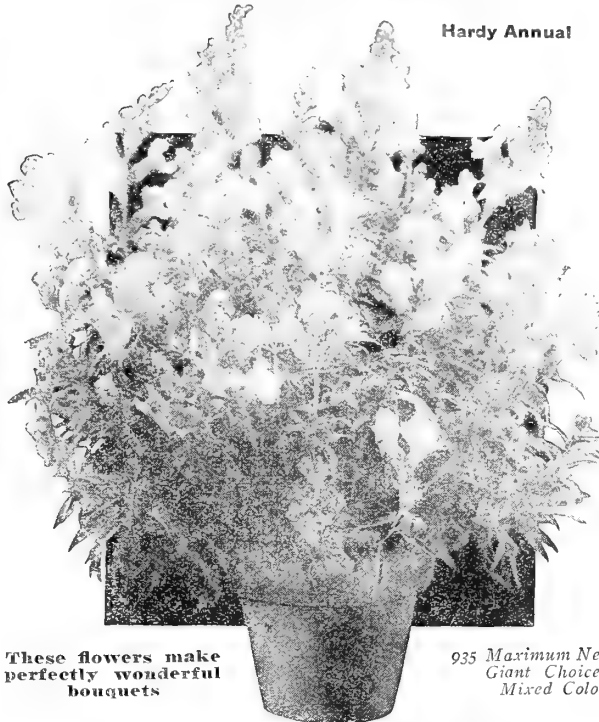

933 THE ROSE. A pleasing shade of rose-pink and yellow, blending into a beautiful rose. Blooms are large, well formed, and make a massive spike. Excellent variety for the home garden. Fine for cutting.

934 SNOWFLAKE. Rich creamy white with yellowish throat. A strong grower, producing many spikes. Very showy.

These flowers make perfectly wonderful bouquets

935 Maximum New Giant Choicest Mixed Colors

Snapdragons are easily grown from seed. If sown early they will bloom in July. If intended for winter flowering inside, cut back plants in September. In some sections, outdoor plants, if given protection during the winter, will bloom earlier and better than the first season.

Maximum, New Giant

938 ORCHID. The color of this flower is a beautiful mauve-pink. Never fails to attract attention.

947 SUNNYBROOK. Combines shades of deep golden yellow, salmon and orange. Attractive.

951 RUBY. A distinct shade of deep ruby-red. While the flowers are quite deep in color they have a glow all their own.

956 WALLFLOWER. Blooms are of a rich deep copery crimson color; large and well formed.

Giant American ASTERS

Perfectly
Beautiful

Hardy
Annual

On these two pages you will find all the most beautiful varieties of Asters that are in popular favor. We have a national reputation for the excellence of our Asters, and it is one of our best sellers. We know of no other flower so easily raised from seed, which combines so much beauty with grace and usefulness, and is more satisfactory to raise. Asters make a brilliant effect when grown in masses, and furnish throughout the season a constant supply of cut flowers.

Giant Astermum

A beautiful strain of the Comet type Aster. In size this wonderful flower is the peer of the grandest Chrysanthemums—hence the appropriate name of Astermums. Flowers are large, with long, gracefully curled petals. Unrivalled for table decoration, and particularly appreciated as cut flowers, coming into bloom a little earlier than Crego Asters. A conspicuous and handsome border, bedding or pot plant. 18 to 24 in. high.

To Have a Profusion of Showy Flowers During Late Summer and Autumn

Be Sure to Plant DAHLIAS

Half Hardy Perennial

Dahlia Plants, from seed sown indoors in a shallow box in March or April and transplanted as soon as danger of frost is past, will bloom abundantly the first summer and give a magnificent display of bright colors late in the season.

Our Seed is saved only from large flowering double Dahlias. As these flowers are hybrids we cannot guarantee type; no two flowers may be exactly alike, and some are likely to be single-flowering. Roots of any favorites may be saved for the next spring by storing them in a cool, but frostproof, room or cellar during the winter.

1274 EXTRA CHOICE LARGE DOUBLE FLOWERING DAHLIAS, MIXED. The seed we offer is saved from choice specimens of the standard varieties, as well as the leading and best introductions that make their appearance each year. A choice mixture of Show, Cactus, Decorative, Peony and Pompon varieties. Some singles may be expected.

Postpaid: Packet 15c; $\frac{1}{8}$ oz. 50c; $\frac{1}{2}$ oz. 85c; $\frac{1}{4}$ oz. \$1.50; 1 oz. \$4.50

1275 DOUBLE CACTUS DAHLIAS, MIXED.

The most popular Dahlia grown. Petals are pointed (see illustration), and are distinct and elegant. The seed we offer is saved from the most select and perfectly double blooms, and many double

flowers may be expected. There also is the chance of some handsome new varieties being obtained.

Postpaid: Packet 20c; $\frac{1}{8}$ oz. 65c; $\frac{1}{2}$ oz. \$1.10; $\frac{1}{4}$ oz. \$2.00; 1 oz. \$6.00

1277 DECORATIVE DAHLIAS, MIXED.

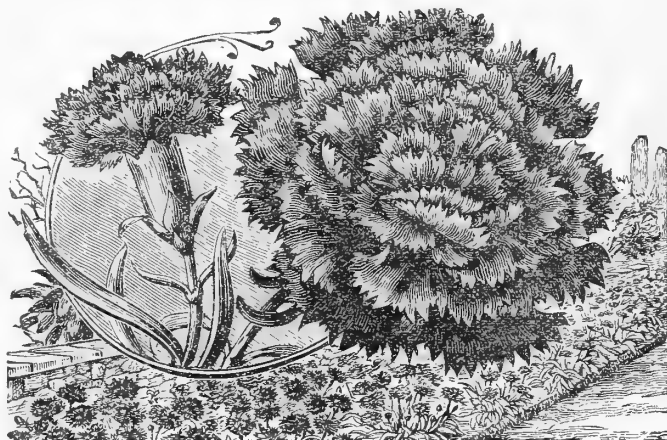

Decorative Dahlias are being grown more extensively every year. Flowers vary somewhat in form, some having flat, broad petals; others reflexed, incurved and twisted petals. The petals are loosely arranged. All varieties bear their large, well developed blooms on long, stiff stems. Ideal for cut flowers.

GIANT PANSIES

(Heartsease) Hardy Biennial

For many years, in fact, ever since we have been in business, we have given particular attention to Pansy seeds. Our customers everywhere know that our strains of Pansies are the most beautiful that can be produced.

Pansies demand good soil, thriving best in a cool, moist, but well-drained position. Do not plant Pansies in the shade of a tree or

building, as this causes straggly plants with very few blooms. Seed sown in April or May will produce blooming plants the last of June, which will continue flowering until end of season. For early spring blooming, sow the seed in August and give plants protection during winter.

Maule's Prize Mixed Giant Pansies

1614 Look for blossoms $2\frac{1}{2}$ to $3\frac{1}{2}$ in. across, of perfect texture, embracing an endless variety of pretty colors. Each year we watch the production of American and European specialists, and secure everything truly meritorious for incorporation into our Prize Mixture.

Pansy seed is a very high priced commodity, and it is next to im-

possible for the average flower lover to buy all the new individual varieties on the market. All the types that are really desirable will be found in Maule's Prize Mixture, which is grown by many for exhibition at flower shows.

1600 MAULE'S GIANT PHENOMENAL.

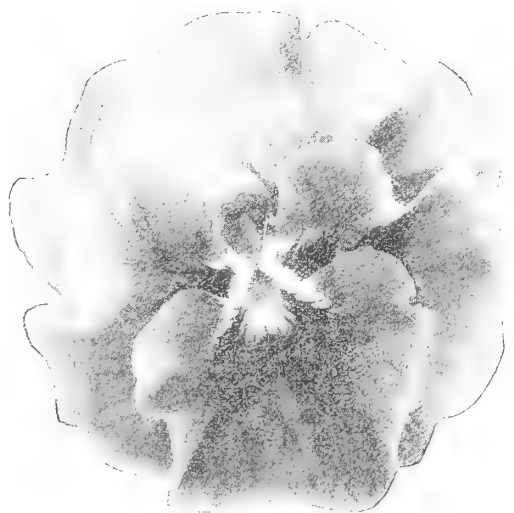

After years of close acquaintance with Giant Phenomenal Pansy, since we introduced it to the American public years ago, we again cordially commend it. As unique as it is large and beautiful. Thousands of our friends now know and admire these lovely flowers. The strain originated in France, consisting of the largest, choicest, and most "phenomenal" specimens that could be selected. Phenomenal Pansy possesses those captivating wine-red shades so rare among flowers.

Petunias

In a Marvelous Variety of

Showy Colors

Hardy Annual

No annual flower is more widely used than the Petunia. It begins to bloom early, and lasts the whole season—until killed by frost. Petunias succeed best in rich soil, and a sunny location.

Selected Ruffled Giant Petunias

(See Picture at Left)

1638 Famous for the immense size of its flowers. Considered by many the prettiest single flowered Petunia grown. Rich colors and markings; fringed or notched petals. Blooms are exquisitely ruffled on edges. Some flowers are 5 in. across. Tints are rich and varied. Curiously veined and penciled.

70B43 Single Tuberos-Rooted Begonias

THE finest and most beautiful plants are easily and quickly grown from Maule's bulbs and roots. With but little care excellent results may be obtained. At our prices you can secure a generous supply of bulbs and roots at a very small outlay, and this is practically the only expense in raising the plants. All bulbs and roots offered in this catalog are large blooming size, and are sure to give the best results.

With every order for bulbs or roots we will send you without charge, a copy of our helpful booklet, "Flowering Plants from Bulbs and Roots." Follow its instructions, and you will have good success.

Important: Many customers order these bulbs and roots during the winter months to plant in pots for house culture, or to start into growth so they will be ready to set out-doors when conditions are favorable. For this reason we ship all bulbs and roots promptly upon receipt of order, so they may be planted in-doors if desired. If not wanted for immediate planting, they can be kept safely until the proper out-door planting time.

Perennial Plants and Roots, such as Peonies, Phlox, Iris, etc., will be sent direct from our nursery at your proper out-door planting time. All Bulb, Root and Plant orders will be handled in the above-mentioned manner unless your instructions to the contrary are clearly specified at time of ordering.

For Large Gorgeous Garden Flowers in Varied Colors be Sure to get Some of Our

Canna Roots

For bedding purposes, Cannas stand at the head of the list. They succeed in all parts of the country, in any kind of soil, but will, of course, do better in rich soil, and if freely watered at all times.

In recent years, Cannas have been constantly improved. The newer types have flowers 6 to 8 in. across, in great clusters of varied and rich colors, borne continuously all summer. The ultimate height given for each Canna may vary with climate and care. Not hardy.

The Red Shades are Gorgeous

75B75 THE PRESIDENT. The finest, largest, and most wonderful red Canna ever offered. The rich, glowing, immense, rounded flowers, 7 in. across when open, are so surpassingly fine that no other red Canna can compete with "The President." Flowers are most attractive, produced on strong, erect stalks well above the large, rich green foliage, which grows about 5 ft. high.

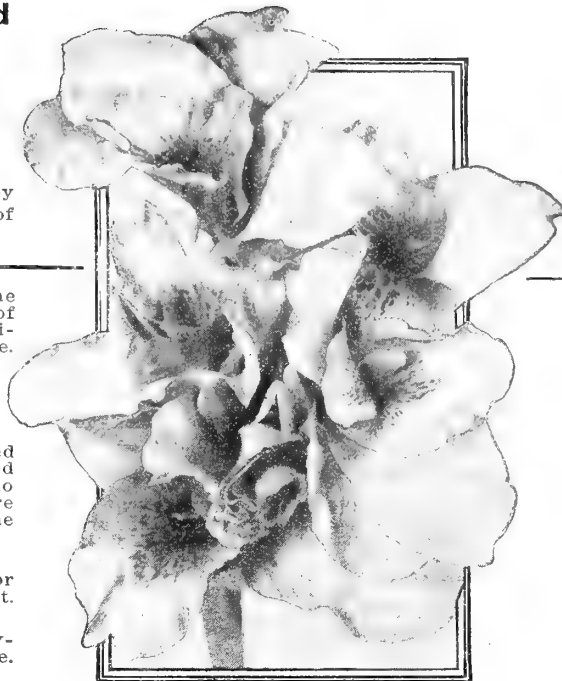

Postpaid: Each 25c; 3 for 70c; 6 for \$1.30; per doz. \$2.50; 25 for \$4.75

75B57 METEOR. One of the best deep blood-red colored cannas for bedding. Flowers and trusses of the largest size. Height, 5 ft.

73N44 Phlox, Jules Sandeau

Although Perennial Phlox succeeds in almost any soil, a little extra care in preparing and enriching the soil, and watering plants in dry weather, will result in better plants and flowers. If first spikes of bloom, usually appearing in July and August, are removed as soon as through blooming, plants will produce a second supply of flowers, and continue until late in autumn.

Roses for Every Home

Brightening and bringing beauty into thousands of homes, Maule's Superior Roses have been known and grown for a generation. They now may be found in home gardens stretched all the way across the country from the Atlantic to the Pacific.

On these two pages we list the Roses most popular today—Roses that have proved their worth in the gardens of our customers. They will do well in a great variety of soils, and if properly planted and cared for, will bloom the first year.

All of our Roses are extra strong, two-year-old, field grown stock, shipped to you in a dormant state, and will quickly start growing when planted.

Hardy Everblooming Roses

90N45
Los Angeles Improved

Widely Known as "Monthly Roses"

The so-called Everblooming Roses are the **Hybrid Teas** and the **Teas**, which are among the most beautiful of all roses. They actually do not bloom all the time, but if kept pruned and cultivated, one crop of flowers succeeds another at brief intervals throughout the summer.

Do best if given some protection in winter. A light covering of straw manure will suffice; or an equally efficient protection may be obtained by heaping about each plant some extra soil, say, 8 in. deep, which should be removed, of course, in early spring.

We ship only 2-year-old, healthy field grown plants.
